ELSEVIER

Volume 185, Numbers 1–2, June 1995

WEAR

Contents

The wear mechanisms of acetal in unlubricated rolling–sliding contact 1
S.N. Kukureka, Y.K. Chen, C.J. Hooke and P. Liao (Birmingham, UK)

Transitions of microscopic wear mode of silicon carbide coatings by chemical vapor deposition during repeated sliding observed in a scanning electron microscope tribosystem 9
H. Kitsunai and K. Hokkirigawa (Ibaraki, Japan)

The failure models induced by white layers during impact wear 17
Y.-Y. Yang, H.-S. Fang, Y.-K. Zheng, Z.-G. Yang and Z.-L. Jiang (Beijing, China)

Plane strain stress distributions in discrete and blended coated solids under normal and sliding contact 23
I.A. Anderson and I.F. Collins (Auckland, New Zealand)

Analysis of sliding behaviour for fretting loadings: determination of transition criteria 35
S. Fouvry, Ph. Kapsa and L. Vincent (Ecully, France)

Basis of a coating choice methodology in fretting 47
J.-F. Carton (Lausanne, Switzerland), A.-B. Vannes and L. Vincent (Ecully, France)

Cavitation erosion of laser surface alloyed coatings on Al–12%Si 59
W.J. Tomlinson (Coventry, UK) and A.S. Bransden (Erlangen, Germany)

Acoustic emission analysis for bearing condition monitoring 67
C. James Li (Troy, NY, USA) and S.Y. Li (Changsha, China)

The influence of surface induced voltage on the wear mode of stainless steel 75
K. Goto (Hyogo, Japan)

Numerical simulation of sliding contact over a half-plane 83
Y.-M. Chen (College Park, MD, USA), L.K. Ives (Gaithersburg, MD, USA) and J.W. Dally (College Park, MD, USA)

Tribological behavior of TiC/TaC-reinforced cermet plasma sprayed coatings tested against sapphire 93
S. Economou, M. De Bonte, J.P. Celis, J.R. Roos (Leuven, Belgium), R.W. Smith (Philadelphia, PA, USA), E. Lugscheider and A. Valencic (Aachen, Germany)

Evaluation of fatigue and wear characteristics of M50 steel using synthetic ester turbine engine lubricants—Part 1 111
H.K. Trivedi, D.T. Gerardi (Dayton, OH, USA) and L. Rosado (Wright–Patterson AFB, OH, USA)

The friction and wear of automotive grey cast iron under dry sliding conditions
Part 2. Friction and wear—particle generation mechanisms and their progress with time 119
M. Terheci, R.R. Manory and J.H. Hensler (Melbourne, Vic., Australia)

The effect of thermal ageing on the abrasive wear behaviour of age-hardening 2014 Al/SiC and 6061 Al/SiC composites 125
W.Q. Song, P. Krauklis (Sydney, NSW, Australia), A.P. Mouritz (Melbourne, Vic., Australia) and S. Bandyopadhyay (Sydney, NSW, Australia)

The relationship between the change in stress intensity factor and wear rate at elevated temperatures for ceramics 131
J.F. Lin and Y.N. Chen (Tainan, Taiwan)

Numerical analysis of subsurface crack failure beneath the pitch line of a gear tooth during engagement 141
Y. Ding, R. Jones and B. Kuhnell (Victoria, Australia)

Dynamic impact wear of TiC_xN_y and Ti–DLC composite coatings 151
A.A. Voevodin, R. Bantle and A. Matthews (Hull, UK)

Determination of heat and thermal distortion in braking systems 159
A. Yevtushenko and E. Ivanyk (Lviv, Ukraine)

Elsevier Science S.A.

Tribological behaviour of laser-clad TiC_p composite coating 167
J.H. Ouyang, Y.T. Pei, T.C. Lei and Y. Zhou (Harbin, China)

Triboemission of charged particles and photons from wearing ceramic surfaces in various hydrocarbon gases 173
K. Nakayama (Ibaraki, Japan) and H. Hashimoto (Mitaka, Japan)

Experimental investigation of the superfinishing process 183
T.K. Puthanangady (Worcester, MA, USA) and S. Malkin (Amherst, MA, USA)

Wear and wear mechanisms of Al–22% Si/Al_2O_{3f} composite 189
S.F. Moustafa (Cairo, Egypt)

Wear mechanism of SiC whisker-reinforced 2024 aluminum alloy matrix composites in oscillating sliding wear tests 197
M. Bai, Q. Xue, X. Wang, Y. Wan and W. Liu (Lanzhou, China)

Lubricated fretting wear of a high-strength eutectoid steel rope wire 203
I.R. McColl, R.B. Waterhouse, S.J. Harris and M. Tsujikawa (Nottingham, UK)

Abrasion of hot flame-deposited diamond coatings 213
A. Alahelisten (Uppsala, Sweden)

A multi-scale measure of particle abrasivity 225
M.G. Hamblin and G.W. Stachowiak (Nedlands, Australia)

Short Communication

Contact stresses in a moderately thin strip (with particular reference to fretting experiments) 235
L.J. Fellows, D. Nowell and D.A. Hills (Oxford, UK)
